

Health Through Warmth

In the recent cold weather, many people reached for the thermostat, which is why the npower Health Through Warmth scheme is raising awareness of the impact that warmth in the home can have on health and wellbeing.

The scheme is managed locally by East Riding of Yorkshire Council, and aims to help vulnerable residents whose health is made worse by inadequate heating. It works with local organisations to identify vulnerable people who need help and to fund and install heating measures, as well as providing benefit checks, fire safety visits, gas connections, insulation and energy efficiency advice.

Help from npower Health Through Warmth may be available to vulnerable homeowners who have a long term illness, a low income with little or no savings and who are unable to fully fund measures, such as a new boiler or heating system (if broken). You do not have to be, or become, an npower customer to benefit from the scheme.

If you have lived in your property for more than six months and you don't have heating or your heating has broken down, Health Through Warmth may be able to help you. Contact your local Health Through Warmth Co-ordinator, based at East Riding of Yorkshire Council, tel: (01482) 396278 or 396358 or Email: energyefficiency@eastriding.gov.uk
